Maintenance

Your DUB-5 is designed to be relatively low maintenance and durable. From time to time, it will become necessary to replace the 12AU7 vacuum tubes. This is a routine task, and Crucial Audio llc recommends that this only be performed by qualified personnel. Dangerous voltages may be present on the circuit board (even if the unit is unplugged from its power adapter), and the glass vacuum tubes are fragile and can shatter. Please, refer tube replacement to a qualified and authorized technician.
